CORPORATE FASHION

THAT CONNECTS

JAMES &
NICHOLSON
by daiber

Gustav Daiber GmbH, the company behind JAMES & NICHOLSON and myrtle beach, is one of the leading corporate fashion platforms in Europe. JAMES & NICHOLSON and myrtle beach offer more than 800 different articles in up to 160 colour variations, timeless designs and a size range from XXS to 6XL. These include expressive promotional wear, functional sportswear and fashionable leisurewear, classic businesswear and hard-wearing workwear. Every year, the diverse product range is supplemented by around 40 new products that are oriented towards the current industry developments and are thus trend-, quality- and price-conscious.

Thanks to the large selection and the coordinated collections, the articles can be perfectly combined with each other. Custom-fit corporate fashion concepts tailored to the respective needs of customers and partners ensure a professional and expressive image. Moreover, almost all the products can be individually

decorated. Thus JAMES & NICHOLSON and myrtle beach always offer the right textile solution from head to toe. With products that create identity and a sense of belonging - for years to come. Another plus is the stock of more than 15 million pieces, which guarantees particularly high stock availability. Customers and partners benefit from short delivery times and smooth shipping.

Along the value chain of products of the brands JAMES & NICHOLSON and myrtle beach great importance is attached to fair treatment of customers and partners, employees and the environment. The focus is above all on a long-standing, reliable business relationship, appreciative cooperation and innovative, long-lasting collections in the spirit of sustainability. From the cultivation of raw materials to the end product, high social and ecological standards apply, which are regularly reviewed and further improved.

RESPONSIBILITY

CORPORATE FASHION WITH A CLEAR CONSCIENCE

Social Compliance

Gustav Daiber GmbH is a long-standing member of the Business Social Compliance Initiative (amfori BSCI) and commits itself as well as its business partners and suppliers to socially responsible business practices. Accordingly, the corporate fashion products of JAMES & NICHOLSON and myrtle beach are manufactured in compliance with the BSCI Code of Conduct.

This code includes, among other things, a clear commitment to the right of employees to freedom of association, protection against discrimination and appropriate remuneration, i.e. a living wage. This ensures humane and respectful treatment of suppliers along the value chain. Furthermore, the UN Guiding Principles on Business and Human Rights apply, as well as the occupational safety regulations of the International Labour Organisation (ILO). Child labour, forced labour or precarious working conditions are not tolerated.

Several independent inspection bodies in the production countries take care of the strict auditing of all factories and ensure compliance with these conditions.

Environmental protection

In addition to social standards, Daiber is also committed to improving environmental sustainability in its international supply chain. By introducing the amfori BEPI system of the Business Environmental Performance Initiative, for example, environmentally oriented services can be monitored and potential for improvement can be identified. This makes it possible to work together with long-standing suppliers to develop new approaches for more product responsibility and a more responsible value chain and to implement them in a targeted manner. For this purpose, the production sites receive special training measures for practical implementation, so that the impact on the environment is continuously reduced.

When manufacturing the products, too, care is taken to keep the environmental impact as low as possible. Thus all the products of JAMES & NICHOLSON and myrtle beach are REACH-compliant, are certified OEKO-TEX® STANDARD 100 and Organic Content Standard (OCS) and thus meet high quality standards. In addition, sustainable materials such as organic cotton and recycled polyester are increasingly used.

Complying with the REACH regulation

The REACH regulation is the European chemicals legislation on the registration, evaluation, authorisation and restriction of chemicals. All the products of JAMES & NICHOLSON and myrtle beach are manufactured in compliance with REACH.

OEKO-TEX® STANDARD 100

This standard guarantees that textile and non-textile product components pose no threat to health. The components of all the products of JAMES & NICHOLSON and myrtle beach, i.e. also all threads, buttons and other accessories, are tested for harmful substances and pose no threat to health.

OCS Standard

The Organic Content Standard makes it possible to record the exact proportion of organic material in the products and to follow it through the production chain. This guarantees product traceability and transparency in the value chain.

Made with 100%
Organically Grown Cotton
Certified by CU853836

Made with 50%–95%
Organically Grown Cotton
Certified by CU853836

Quality Standard

The products are continually examined by certified testing institutes in the countries of production regarding the given parameters. Moreover, in cooperation with SGS, Testex, Hohenstein and other renowned institutes, the quality is continually controlled.

Recycled Polyester

The increasingly used recycled polyester is made from collected PET-bottles, which are crushed, melted down and spun to yarn again, which is sometimes completely integrated into the production. For example, for producing the workwear cap MB6234 about 3half-litre bottles are recycled and for the new sport T-shirt JN519 even 25.

SUSTAINABILITY

ORGANIC COTTON

Organic Cotton Collection - Clothes with inner values

Fair, transparent, harmless: The Organic Cotton collection includes a wide range of sustainably produced organic cotton clothing for every fair fashion lover. The Organic Cotton collection by JAMES & NICHOLSON and myrtle beach impresses with a high quality combined with modern cuts and tasteful details.

The naturalness is not only visible but also perceptible. Knowing that the components of the garment are made of sustainably grown cotton and that no genetically modified fibres are used conveys a completely new attitude towards life.

OCS Standard

When manufacturing garments of myrtle beach and JAMES & NICHOLSON, the Organic Content Standard is a standard for verifying and tracking the exact content of organically grown materials in a final product. Among other things, the superordinate 'Content Claim Standard' defines with OCS the traceability of merchandise as well as the transparency within the production chain.

RECYCLED POLYESTER

PET bottles are recycled to create a new fashion

Collected plastic bottles are crushed, melted down and spun to yarn again, which is sometimes completely integrated into the production. Thus for producing the workwear cap MB6234 about 3 half-litre bottles are recycled and for the new sport T-shirt JN519 even 25.

CLIMATE NEUTRAL CATALOGUE

CERTIFIED CLIMATE PROTECTION

We assume responsibility for our climate.

This means that by supporting an international climate protection project by climatePartner, we compensate for the inevitable CO₂-emissions resulting from the printing of our catalogues.

Transparent climate protection

A certificate by ClimatePartner confirms our CO₂ compensation.

114,000 kg CO₂ – compensated for

Our climate protection project + planting trees

This combined project contributes to financing a certified climate protection project thus supporting the planting of additional trees in Germany.

We plant one tree in Germany for every tonne of CO₂ saved through the contribution via a certified climate protection project. Thus we promote the conversion of structurally poor forests and monocultures to more resistant mixed forests. Currently, the planting of trees in Germany is combined with a certified reforestation project in China.

With every sheet of recycled paper we improve our ecological footprint

Recycled paper protects forests, biodiversity and the climate and saves energy, water and CO₂ during production. For producing our this year's main catalogue, we are using 100% FSC certified recycled paper.

Savings potential by using recycled paper

Consumption	Fresh fibre paper	Steinbeis recycled paper	Saving
 Wood (in kg)	217,554	0,0	100%
 Water (in l)	5,085,350	1,037,472	79%
 Energy (in kWh)	1,313,000	352,187	73%
 CO ₂ -emission (in kg)	98,071	56,459	42%

FSC Recycled

The FSC Recycled logo stands for products which contain only recycled paper.

The text in the logo reads:
'Product type made from recycled paper'

FUNCTIONS & FEATURES

EASY CARE

This special finish makes shirts and blouses especially easy to iron. To preserve this function the textiles should not be overdried in the tumbler and you should avoid using an overheated iron.

SOFTSHELL

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

NON IRON

This special finish makes shirts and blouses iron-free: All you have to do is wash them, dry them and put them on. To preserve this function, these textiles should not be overdried in the tumbler and you should avoid using an overheated iron. If necessary, seams can be ironed at a low temperature.

BIONIC-FINISH® ECO

BIONIC-FINISH® was developed, following the example set by nature, 'learning from nature'. The textile is protected against water and dirt by a very thin crystalline structure. BIONIC-FINISH® ECO protects man and nature.

BREATHABILITY / PERMEABILITY TO VAPOUR

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1m² within 24 hours. The higher this figure, the more breathable the textile is.

CAPS FOR PRINTING

Caps with this label are ideal for printing and embroidering. The construction of the caps leaves a lot of space so the cap is easy to decorate, with the logo presented to perfection.

WATER COLUMN

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

UPF 50+

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. Therefore, the UPF-indication on textiles corresponds to the sun protection factor of sun-screens. This is based on the self-protection time of the skin, which varies considerably depending on the individual skin type.

TAPED SEAMS

To avoid moisture penetrating into the fabric, seams and stitches can get taped. Taped seams are 100 % water-proof.

COOLDRY®

Due to the CoolDry® finish moisture is transported to the outside and creates a comfortable feeling. The textiles dry quickly, are breathable and ideal for all activities.

LYCRA®

Lycra® allows the fabric both to stretch significantly and to retain its shape. Fabrics and garments containing Lycra offer exceptional fit, comfort, freedom of movement and wrinkle recovery.

CORDURA®

CORDURA® is a very sturdy, textured polyamide fabric, which is extremely tear- and abrasion-proof. Special yarns, specially developed weaving techniques, dyeing methods and additional textile finishing ensure that products with CORDURA® can be used as durable and comfortable workwear.

THINSULATE™ INSULATION

The light-weight thermal insulation affords optimum protection against cold despite its minimum thickness. It even keeps you warm in damp or wet conditions. Thinsulate™ INSULATION offers excellent comfort and allows optimum room to move. It is extremely breathable, durable and easy-care.

COOLMAX®

Through the channels of the breathable COOLMAX®-fibre humidity is evacuated extremely fast to the outer layers of the fabric. Thus the body is kept dry. At the same time a natural temperature control of the body is supported.

TOPCOOL®

TOPCOOL® polyester fibres perfectly absorb moisture due to their special surface and evacuate it quickly to the outside where it can evaporate. The skin stays comfortably dry and a constant temperature level of the body is maintained.

SORONA® AURA

sonora®AURA fibers consist of 37% vegetable components, obtained from renewable raw materials. Garments with sonora® Aura offer an eco-friendly alternative with outstanding breathability, lightweight comfort and efficient heat retention. sonora®AURA offers the perfect mix of sustainability and performance.

UPF 50+

Coming to grips with
the sun thanks to
workwear with certified
UV-protection

98% Shielding of

UPF 50+

SUN PROTECTION AT WORK

Workwear with certified
UV-protection

The more UPF, the better

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. Therefore, the UPF-indication on textiles corresponds to the sun protection factor of sunscreens. This is based on the self-protection time of the skin, which varies considerably depending on the individual skin type.

Correctly assessing the risk

People working outdoors

Many people work outdoors all day or part of the day. They have a much higher risk of contracting skin cancer than people working indoors. The same goes for leisure activities outdoors. The sun is your constant companion and supplies the vital vitamin D. But a lot of sun also means: headgear, sunscreen and UV-protective clothing.

UVA/UVB-rays

UV-radiation is especially strong in the months of April to September; from 11 a.m. to 4 p.m.

The dangers of UV-radiation

UV-RADIATION ALSO EXISTS WHEN THE SUN IS NOT SHINING

ALSO PENETRATES THE CLOUDS

EXISTS INDEPENDENT OF OUTDOOR TEMPERATURE

PENETRATES LOOSE TISSUE

IS REFLECTED BY SURFACES SUCH AS METAL, WATER, CONCRETE

UV-clothing provides better protection than sunscreen

The best protection against harmful UV-radiation is provided by certified UV-protective clothing. It shields off radiation, does not have to be applied once again like sunscreen and therefore lasts all day. For the parts of the body uncovered by clothes sunscreen with a high sun protection factor and a headgear should be used.

Australian/New Zealand Standard AS/NZS 4399:2017

The best-known and worldwide most common standard is the Australian-New Zealand standard. For checking the UV-protective factor according to AS/NZS 4399:2017, the UV-protection is established on a new and dry textile. For this purpose, the solar spectrum of Melbourne, Australia, is reproduced. Clothing marked with the Australian/New Zealand standard provides protection against UVA- and UVB-radiation of sunlight. A product marked with UPF 50+ according to this standard blocks more than 98% of the harmful UV-rays. The textiles protect the parts of the body covered by them.

Tested textile UV-protection

The LABTECH Prüfungsgesellschaft mbH is officially accredited according to DIN EN ISO/IEC 17025 2005 and based on this standard, they test as an independent laboratory the UV-protective factor of our textiles.

WASHING (TUB)

The numbers in the tub indicate the maximum washing temperatures which must not be exceeded. The bar below the tub requires a more (mechanical) gentle treatment (e.g. programme for delicate fabrics). It designates washing programmes which are suitable for easy-care and delicate garments. Textiles made of cotton or mixed fibres should be pulled into shape when still wet. We recommend that textiles with prints or embroideries should only be washed on the reverse at a maximum of 40 degrees in order not to impair the quality of the print or embroidery.

Normal washing

Delicate washing

Normal washing

Delicate washing

Normal washing

Delicate washing

Specially delicate washing

Delicate washing

Hand washing

DRY CLEANING (CLEANING DRUM)

The letters are intended for the textile cleaner. They indicate the possible solvents. The bar below the circle requires cleaning under limited mechanical strain, with a limited amount of moisture and at a medium temperature. **Textiles with prints or embroideries should not be dry cleaned.**

Normal clothes

Delicate clothes

Delicate clothes

Delicate clothes

Wet cleaning

Delicate wet cleaning

Special wet cleaning

No dry cleaning possible

IRONING (IRON)

The dots indicate the temperature scale of the irons. Textiles with prints or embroideries should only be ironed on the reverse.

Iron at high temperature (max. 200 degrees)

Iron at medium temperature (max. 150 degrees)

Iron at low temperature (max. 110 degrees)

Do not iron

TUMBLE DRYING (TUMBLE-DRIER)

The dots indicate the drying-grades of the tumble-drier. Textiles with transfer prints must not be tumble-dried.

Tumble dry at normal temperature

Tumble dry at low temperature

Do not tumble dry

BLEACHING (TRIANGLE)

This symbol shows the textile cleaner whether the garment may be bleached or not.

Chlorine bleaching possible

Only oxygen bleaching
No chlorine bleaching

Do not bleach
